Special Import Prices on Bay Trees and Araucarias

For several years we have made a special feature of booking advance orders for Spring delivery for Bay Trees and Araucarias, which has met with such encouragement from the trade throughout the country that we have continued this special arrangement with the most extensive Belgian grower of this class of plants and we herewith again submit prices at which we can accept advance orders for Spring imports, delivery to be made at any time between April 15th and May 15th, but orders to secure these special import prices must reach us not later than March 25th, or, if possible, earlier, so that the trees may be reserved.

These import prices, including packing and delivery F. O. B. Philadelphia or New York, are much lower than our regular list price, and we offer an exceptionally full line of sizes in all forms.

Do not overlook the fact that these prices are only for advance orders which must reach us before March 25th, 1913.

Standard Bays with Square Heads

This is a new form in Bays, stems 45 to 48 inches high, the square heads being 40 inches in diameter. These are growing in square tubs to conform to the shape of the crowns. \$25.00 each.

Standard Bay with Square Head

Imperial Pyramid-Shaped Bay

Imperial Pyramid-Shaped Bays

These are pyramid-shaped crowns grown on stems in the same way as the regular standards. They make very unique specimens.

Special Import Prices

on

Araucaria Excelsa, Glauca and Compacta

FOR EARLY SPRING DELIVERY

We again call your attention to the special prices on Araucarias at which we are in position to accept import orders, delivery of which will be made during the latter part of April or early in May.

Many of our customers took advantage of similar import offers the past four years, and, as far as we know, the stock gave universal satisfaction, and having again made special arrangements with the most extensive Belgian growers, we believe that we are in position to give as good, if not better service than in past years.

You will find this profitable stock to handle. It will grow into value during the summer months at comparatively little cost for labor, with a positive and profitable market for it during the holidays.
